

WHAT IS AIR-QUALITEE?

A-Q is a European-based indoor air quality and sustainability solutions provider delivering advanced technologies, standalone systems, and expert consulting that enable buildings to achieve measurable health, energy, and ESG performance improvements.

A-Q combines cutting-edge air purification technologies with real-time data transparency and certification expertise, helping clients upgrade existing buildings and new developments toward green building standards such as LEED and ESG/CSRD compliance—with immediate, visible results.
