

AIR-QUALITEE

Three Technologies. One Clear Mission.

Air-Qualitee delivers high-performance air and odor control solutions designed for enclosed spaces with limited ventilation and immediate performance needs. Our technologies are fully retrofittable, easy to deploy and add value to the space.

SagoOdor UVV Odor Removal

What it does

Actively breaks down odor molecules - not masking, not perfuming.

How it works

Advanced odor-neutralization technology integrated into air circulation for specific problem zones.

Why it sells

- Eliminates persistent and heavy odors
- No fragrances, no chemicals in the air
- Works where standard air fresheners fail
- Perfect for trash rooms, waste areas, loading docks, technical rooms

PuriCage Professional Purification System

What it does

Delivers immediate odor reduction and air purification in enclosed spaces.

How it works

A high-performance unit proudly displayed in the room, creating a controlled micro-environment with continuous air treatment.

Why it sells

- Instant, noticeable results
- Ideal for public restrooms, kitchens, locker rooms, storage rooms and small manufacturing areas
- Highly visible proof of action for clients & employees

IN-EX Antimicrobial Patches

What it does

Neutralizes microorganisms at the HVAC systems before they circulate.

How it works

Self-adhesive antimicrobial patches installed onto the fan-coils continuously inhibit bacteria, mold, and bio-contamination.

Why it sells

- Targets contamination at the source
- No airflow restriction, no pressure loss
- Easy replacement solution
- Ideal for offices, healthcare, logistics, food & hospitality

Three Solutions - One Clear Story

A-Q mission is to:

- Cover HVAC, room-level, and odor-source problems
- Provide immediate ROI, noticeable impact
- Easy upsell & bundling opportunities
- Supports ESG, hygiene, and workplace wellbeing goals

Immediate results. Full transparency. Clean air that works.
